PROFESSIONAL SUMMARY

Information Technology graduate with a Bachelor's degree. Completed an internship at Accenture with hands-on experience in Salesforce administration. Experienced with software development using Dart, Flutter, Java, HTML, and CSS through academic and capstone projects. Looking to begin a career in software development where I can apply my knowledge to build software applications while continuing to grow in the IT industry.

WORK EXPERIENCE

Salesforce Administrator Intern

Feb 2026 – May 2026

- Configured Salesforce objects, fields, and page layouts through Trailhead hands-on activities to organize data and improve how information is displayed to users.
- Managed user access and permissions using profiles, permission sets, roles, and security settings to provide users with the appropriate level of access in Salesforce.
- Customized Salesforce pages using Lightning App Builder by arranging components and page layouts improve the user experience.

PROJECTS

JFCM Taytay – Informational Church Website with File Management System

Jan 2026 – Feb 2026

- Developed the frontend of an informational church website using HTML and CSS, including the admin login page and landing page featuring information about the church to provide visitors with an easy way to learn about JFCM Taytay.
- Designed and implemented the admin-side interface, including the dashboard, teachings, profile, and user management pages, providing admins with an organized interface for handling files and user accounts.

FamiLee Inventory – Android-Based Inventory Management System

Aug 2025 – Nov 2025

- Developed core modules using Dart and Flutter, including inventory management, purchase orders, stock deduction, dashboards, and activity logs to improve inventory tracking and user activity monitoring for dental supplies.
- Implemented role-based access to restrict system features and permissions based on user roles (Owner and Staff).
- Integrated Supabase functionality for storing inventory records, user data, and uploaded files to ensure application data was stored and managed properly.

ShoeZam – Footwear E-Commerce Desktop Application

Jan 2024

- Built a Java-based desktop application for a footwear e-commerce system with user registration, login, product catalog, shopping cart, and order confirmation to provide a basic online shopping experience.
- Applied object-oriented programming concepts using Java classes and objects with Java Swing to build and organize the application's core modules.
- Designed the application interface based on the Figma prototype to provide a consistent and user-friendly experience.

EDUCATION

Bachelor of Science in Information Technology – STI College Ortigas-Cainta

2022 – 2026
